Tin Foil Dragon

Tools and supplies:
- Dragon silhouette
- Cardboard
- Tin foil
- Permanent markers
- Scissors

Instructions
- Print out the dragon silhouette. Pick a shape without too many details that would be hard to cut around.
- Glue the shape to one side of a piece of thin cardboard like the back of a pad of paper or a cereal box.
- Take a sheet of tin foil and glue it completely to the other side of the cardboard.
- When all the glue is dry, cut out the dragon shape. If any tin foil is lost you can glue a small patch or wrap it around the edge of the shape.
- Color the dragon with permanent markers.
- Display and enjoy.
